Installation

The Dan M3 is for use on all types of lifejackets.

The Dan M3 is supplied with a fixing clip. The clip is intended to be placed behind a strip of lifejacket material or reflective tape; the light is secured by pressing it into the clip.

Light and fixing clip (part no. 1950 for standard grey clip) separated to show material path.

It is the responsibility of the lifejacket manufacturer to ensure that the light is attached securely and is in the correct position on the lifejacket to provide maximum visibility when the wearer is in the water.

Operation

The DAN M3 is switched on by pressing the on/off button for *one second and can be deactivated by pressing the button* again.

Figure depicts the manual 'ON/OFF button'

Maintenance

Routine service

Dan M3 is maintenance free, but the following checks must be made annually:

1. Inspect the light for signs of damage or corrosion.
2. Press and hold for *one second the on/off button and the light will commence flashing, and then press the button once more* and the light should deactivate.

Replacement

The Dan M3 lifejacket lights have a storage life of 5 years and must be replaced by the date shown on the label.

Health and safety information

Dan M3 lights contain Lithium cells. These must be handled correctly:

- Do not dismantle the light assembly
- Do not make any external electrical connection
- Do not recharge
- Do not incinerate

Store between -30°C and +65°C

The Batteries are hermetically sealed pressurised primary Lithium/Manganese cells, as supplied are electrically protected by a solid-state device, and are environmentally protected by a moulded plastic housing. In this condition, the units pose no definable hazard to health.

Information on the composition and behaviour of these products is contained in the Product Safety Data Sheet, available from our website (www.daniamant.com) or on request.

Disposal

Dispose of used and expired lights in accordance with local regulations. This could be done through an approved environmental disposal agent.

All Daniamant product disposal instructions are available within the user instruction leaflet provided with the product, or alternatively, available for download on this website.

Daniamant's Survivor Location Lights contain batteries as well as electrical and electronic components, and must therefore be segregated from the domestic waste stream and recycled. Disposing of this product correctly will help save valuable resources and prevent any potential negative effects on human health and the environment, which could otherwise arise from inappropriate waste handling. Daniamant's lights are marked with the symbol below, which conveys that this waste must be treated separately from household waste.

To ensure compliance with the WEEE and Battery Regulations, the Survivor Location Lights placed on the market in the UK or Denmark should be returned to Daniamant in the UK or Denmark, or deposited in your nearest WEEE Designated Collection Facility, operated by your Local Authority.

Further copies of this installation and maintenance instructions are available to download from our website **www.daniamant.com**

A copy of these instructions must be held with the ships/owners training manual.
