

SURVIVAL CRAFT INTERNAL LIGHT TYPE "RESCUE-DAN R.EXT"

Operation, Maintenance & Service Instructions

Operation

Pull the activation pin out of the socket and the light will illuminate.

In case of an inflatable life raft the lights is provided with a cord attached to the pin, so the pin automatically during inflation will be pulled away from the light.

The light can be turned off by using the spare pin attached to the light.

Maintenance

The power source is maintenance free lithium battery with a shelf life of min. 5 years, but the following checks must be made annually:

1. Inspect the battery for signs of damage or corrosion.
2. Activate the battery

The battery pack is separate from the lamp and shall be replaced after 5 years from production date.

The Light unit (lamp) must be replaced after the 5 years together with the battery pack.

The expiry (replacement) date is indicated on the label by month and year.

Service intervals

It is recommended to activate the light approx. 1 minute during the raft service.

The light can be turned off during service by using the spare pin.

Inspect the light for deterioration and replace it found faulty.

Safety Precautions

- Do not dismantle the battery pack nor the light assembly.
- Do not make any external electrical connections other than connecting lamp to battery.
- Do not recharge.
- Do not incinerate.
- Store between -30°C to +65°C

All Daniamant product disposal instructions are available within the user instruction leaflet provided with the product, or alternatively, available for download on this website.

Daniamant's Survivor Location Lights contain batteries as well as electrical and electronic components, and must therefore be segregated from the domestic waste stream and recycled. Disposing of this product correctly will help save valuable resources and prevent any potential negative effects on human health and the environment, which could otherwise arise from inappropriate waste handling. Daniamant's lights are marked with the symbol below which conveys that this waste must be treated separately from household waste.

To ensure compliance with the WEEE and Battery Regulations, the Survivor Location Lights placed on the market in the UK or Denmark should be returned to Daniamant in the UK or Denmark, or deposited in your nearest WEEE Designated Collection Facility, operated by your Local Authority.
